

HEALTHCARE SERVICES

# Optimizing Systems for Efficient, Cost-effective Operation

**EMCOR Services**  
Shambaugh

EMCOR Services Shambaugh (ESS) offers comprehensive mechanical, electrical, and plumbing (MEP) services to the healthcare and pharmaceutical markets, along with building operations services and preventive maintenance programs. Our team understands the unique requirements of healthcare buildings and is committed to helping customers achieve more efficient, productive facilities.

## Single-Source Chiller Services

With complex technologies and shifting decarbonization and optimization goals, programming a chiller plant has become a unique specialization, and getting it right is critical—especially in healthcare environments where reliable and efficient function is paramount.

Regardless of its type, age, or manufacturer, virtually every chiller plant can improve performance with our expert guidance. ESS provides a single-source solution, whether you want to improve reliability, sustainability, or reduce energy costs.

## WHAT CAN WE DO FOR YOU?

### EMCOR Services Shambaugh

A Division of Shambaugh & Son, L.P.

5610 West 82nd Street

Indianapolis, IN 46278

T: 317.803.4200

## Keeping Your Systems Connected

We deliver a full array of solutions for IT deployments in hospitals and similar environments. Count on us for digital services that support medical software for screening, triage, laboratory, and care applications.

### Our expertise includes:

- > IT infrastructure
- > Micro data center solutions
- > Prefabricated data centers
- > Cybersecurity monitoring software
- > Surge suppression
- > Line conditioning

## Precise, Effective Environmental Control

We provide and support the latest environment controls and software found in healthcare facilities, including systems for maintaining temperature, humidity, air exchanges, pressurization, and alarms.

## MEP SERVICES BUILT FOR HEALTHCARE:

### Mechanical systems

- Customized building control systems
- Chiller plants
- Precise room controls

### Power system optimization

- Primary and back-up power systems
- Microgrids/Distributed energy resources
- System monitoring

### IT networks/infrastructure

### Preventive maintenance

### Our expert team can help with:

- > Monitoring, occupancy, and safety systems
- > Measuring and maintaining room pressures
- > Building Monitoring System (BMS) solutions

## Ensuring Power for Critical Systems

Our power systems help keep lights on, reduce unplanned outages, and optimize power quality for critical medical equipment.

- > Surge protection, line conditioning, and back-up power
- > Equipment installation
- > Microgrid solutions and distributed energy resources
- > Electrical infrastructure monitoring
